Sari Saldi

Junior Data Analyst | Kendari, Sulawesi Tenggara
sarisaldi54@gmail.com | +62 822-3810-7067 | linkedin.com/in/sari-saldi | sary332.github.io

SUMMARY

Junior data analyst with 2+ years of Excel-based sales and cost analysis in two food businesses. Tracked 2,500+ monthly unit sales to guide production, compared suppliers to cut raw material costs by 16%, and tested pricing to clear slow-moving stock. Built 6 end-to-end portfolio projects in SQL, Power BI, and Excel on simulated datasets (3 shown below), covering churn analysis, operations analytics, and data consolidation. Seeking a full-time analyst role to learn from an experienced team.

TECHNICAL SKILLS

Languages & Query: SQL (T-SQL, CTEs, window functions, subqueries)
Visualization & BI: Power BI (DAX, star schema modeling, time intelligence)
Analytics & Statistics: Hypothesis testing, confidence intervals, linear regression, cohort analysis, scenario modeling
Tools: Microsoft Excel (Power Query, Power Pivot, DAX, Scenario Manager, Goal Seek), Google Workspace, Notion
AI & Workflow: Custom Claude skills, MCP tool integration, human-in-the-loop workflow design

WORK EXPERIENCE

HaSa Kitchen, Kendari 2025 - Present
Co-founder & Operations Manager
- Co-managed weekly production and sales of 250+ packs across 7 product variants as a 2-person team, from sourcing to delivery
- Built Excel models for ingredient costing, selling price optimization, and raw material price simulation, enabling data-backed pricing and bulk order decisions
- Tracked raw material price changes and adjusted pricing 2-3 times with controlled increases of 0.5-1.5%, balancing profitability and customer retention
- Introduced a ~17% bundle discount on a slow-selling 30-pack batch, selling the remaining 8 packs within 1 day
- Grew loyal customer base 4x within 3 months through direct sales via WhatsApp

MIA Ice, Kendari 2023 - 2024
Sales & Operations Associate
- Recorded and analyzed 2,500+ monthly unit sales across 6 product variants in Excel to support production planning
- Identified a low-demand variant through sales data analysis and paused its production for a month, increasing output of high-demand flavors by 60%
- Compared pricing from 6 suppliers in Excel, leading to vendor changes that reduced raw material costs by 16%

PORTFOLIO PROJECTS

SaaS Subscription & Churn Analysis *SQL (T-SQL)*
- Cleaned and joined 6 relational tables, then built date-based monthly active subscriber logic to compare logo churn vs revenue churn
- Tested 3 competing stakeholder theories with 95% confidence intervals and sensitivity checks, finding that ~56% of cancellations followed unrecovered failed payments
- Showed subscriptions with failed payments were 38x more likely to cancel within 30 days (61.4% vs 1.6%)

IT Helpdesk & Support Ticket Performance *Power BI*
- Built an interactive two-page dashboard with DAX time intelligence, comparing performance before and after a 123% jump in ticket volume
- Found the team with the highest SLA breach rate (56.9%) also had the highest CSAT (3.78/5), and recommended headcount allocation for 3 new positions

Digital Product Sales Consolidation *Excel (Power Query, Power Pivot, DAX)*
- Consolidated 3 differently-formatted sales channels with Power Query, filtering 9.6% invalid transactions and standardizing product codes
- Showed the apparent top channel dropped to rank 2 after cleaning, and quantified a 26.9 percentage-point margin gap between channels

CERTIFICATIONS

- Google Data Analytics Professional Certificate, Google (Coursera)
- SQL for Data Science, University of California, Davis (Coursera)
- Advanced Excel Dashboard Design, Maven Analytics
- Power Query, Power Pivot & DAX, Maven Analytics
- Power BI Desktop, Maven Analytics
- Statistics for Data Analysis, Maven Analytics

EDUCATION

Universitas Muslim Indonesia (UMI), Makassar 2021
Bachelor of Arts, English Literature
